

APPENDIX M

**TRIBUTARY SIGNAGE GUIDELINES
AND STANDARDS**

DIVISION OF TRAFFIC ENGINEERING

SUBJECT:

Public Drinking Water Protection Area

STATEMENT OF PURPOSE:

To identify to emergency personnel, responding to incidences on State highways involving accidental dispersal of materials which could pose contamination to public water supplies, that special precaution should be taken in containing these materials.

DESCRIPTION:

The Division of Traffic Engineering will evaluate requests from water authorities and the DEP for placement of signs indicating when entering or leaving public drinking water (watershed/wellhead) areas. Accommodation of requests will take into consideration whether the addition of these signs to the roadway signing pattern can be accomplished without lessening the effectiveness of other signs or detracting the motorist's attention away from the tasks essential to driving.

Additionally, smaller signs, not facing traffic, may be erected along State highways at other appropriate points in watershed/wellhead areas. These secondary sign locations may be selected at points along State highways by the appropriate water agency, where their purpose will be best realized by emergency personnel.

Signs facing traffic at locations found to be acceptable for installation by the Division of Traffic Engineering shall be installed by the Department. The type and corresponding catalog numbers of the signs to be used are as shown:

<u>Sign Cat. No.</u>	<u>Size</u>		
51-5928	24" x 36" (600 mm x 900 mm)		(SILVER/GREEN)
51-5929	60" x 72" (1500 mm x 1800 mm)		
<u>Sign Cat. No.</u>	<u>Size</u>		
51-5930	24" x 36" (600 mm x 900 mm)		(SILVER/GREEN)
51-5931	60" x 72" (1500 mm x 1800 mm)		

Signs not facing traffic should be installed by the appropriate water authority, under permit obtained from the appropriate Department District Office. The signs should be of a reasonable size, as determined by the appropriate District Office when a permit application is filed.
